

BN 603

By DrTrenchcoat

In the 1980's, Burlington Northern's Hi-Line Subdivision had one westbound local train across the entire subdivision; that train was symbol 603. You will cross the entirety of the Hi-Line, from Havre all the way to Whitefish in this five part scenario set in 1986.

Installation instructions: Drag the "content" folder into your railworks directory

Requirements

Payware:

Name	Developer	Link	Which part(s) is it required for
BNSF Locomotive pack (it includes the old RSC BN GP38-2, BN F45, and BN SD40-2)	DTG	https://store.steampowered.com/app/222581/Train_Simulator_BNSF_Locomotive_Pack_AddOn/	All

Montana Hi-Line	VNHRR	https://store.steampowered.com/app/1055338/Train_Simulator_Montana_HiLine_Shelby_Havre_Route_AddOn/	1,2
Marias Pass	DTG	https://store.steampowered.com/app/222561/Train_Simulator_Marias_Pass_Route_AddOn/	3,4,5.
Soldier Summit (for the empire builder and a static consist, should be easy to RWtools out)	DTG	https://store.steampowered.com/app/277775/Train_Simulator_Soldier_Summit_Route_AddOn/	2
US Loco and Asset Pack	Kuju	https://store.steampowered.com/app/208306/Train_Simulator_US_Loco_Asset_Pack/	3

Notes:

- All but three freights (that were not unit grain trains) were taken from the BN Symbol Database on [CarrTracks](#)
- A couple of the trains included were added in the 1987 and 1988 timetables, but I included them for variety, I also doubt there would be as many grain trains as I included, but I added them for variety.
- The well cars in the scenario are from about 20 years in the future, but I didn't want to add another DLC requirement (for a loco which I would have had to buy just for this)
- I do not own the standalone F40PH and so I used the soldier summit one, sorry.
- AMTK 8's times were taken from [Timetables.org](#)
- AMTK 8's formation was based on a photo from [Railpictures.net](#) with the exception of the ex-high level transition car and the MHC

- BN 602's formation was based on this photo from Railpictures.net
- If you have questions or comments, you can contact me at [DrTrenchcoat's Scenarios](https://www.facebook.com/DrTrenchcoat) on Facebook. (I will try to get back to you, but rarely check facebook more than every couple of days)
- I tried to ensure there were enough AI and static trains to keep things interesting however If you do not enjoy trundling slowly along scenic routes with little AI I would recommend enabling asynckey, there is a nice manual on how to do it [here](#)
