Good morning,

Today, you are driving the RE 42 from Mönchengladbach Hbf on the section from Duisburg Hbf to Essen Hbf with a BR 425. There, a colleague will take over the train in the direction of Münster (Westf) Hbf. Your departure is at 08:02. Have fun!

The AI passenger traffic is based on a timetable from June 17, 2021, but unfortunately cannot be implemented completely realistically due to limitations imposed by the Scenario Designer.

If you don't own one of the optional add-ons, you will have to change or remove the corresponding AI trains yourself in the scenario editor.

- Hauptstrecke Rhein-Ruhr (Scenario Route & Player Train)

Optional Add-Ons (AI Trains)

- Schnellfahrstrecke Köln
- Hauptstrecke München - Augsburg
