IC 2026 Wuppertal Hbf – Hagen Hbf

Stop	Arrival	Departure	Platform
From Frankfurt (Main) Hbf			
Wuppertal Hbf	08:41	08:43	2
Hagen Hbf	08:59	-	6/5
To Hamburg-Altona			

Good morning,

today, you are driving the Intercity 2026 from Frankfurt (Main) Hbf on the section from Wuppertal Hbf to Hagen Hbf with a BR 101. Your train is running in a different car line-up today. In Hagen, a colleague will take over in the direction of Hamburg-Altona. Your departure is at 08:43. Have fun!

The AI passenger traffic is based on a timetable from June 16, 2021, but unfortunately cannot be implemented completely realistically due to limitations imposed by the Scenario Designer.

If you don't own one of the optional add-ons, you will have to change or remove the corresponding AI trains yourself in the scenario editor.

Mandatory Add-Ons

- Rhein-Ruhr Osten (Scenario Route)
- DB BR 101 (Player Train)

Optional Add-Ons (AI Trains)

- Schnellfahrstrecke Köln
- Hauptstrecke München – Augsburg
- Hauptstrecke Rhein-Ruhr
- Main-Spessart Bahn
- Ruhr-Sieg Nord
- DB BR 155

Freeware

- [RRO Scenario Designer Path Extension](#) v1.0
- [MSB Scenario Designer Formations Expanded](#)
- [Optional] [Talent 2 National Express Livery (Skyman_Luna)](#)
- [Optional] [BR 422 VRR Repaint (Nickhawk)](#)
  - HRR version

Installation

Add the .sav file to this folder:

Documents/My Games/TrainSimWorld2/Saved/SaveGames

You can then find the scenario in the game under: Rhein-Ruhr Osten -> Tools -> Scenario Designer -> IC 2026 Wuppertal - Hagen

Deinstallation

Delete the .sav file.
